## CONTENTS :

### Review

Basic informations and clinical considerations on drug-induced gingival overgrowth  
Kazushi KUNIMATSU, Yukio OZAKI... 1

### Originals

X-ray study of bone regeneration model using basic FGF-incorporated acidity gelatin  
Takemitsu SAWADA...11

Effects of inflammatory chemical mediators on porcine lingual arterial smooth muscle  
Takeshi NISHI, Ken-ichi SATOH...25

The quantitative analysis of rat alveolar bone regeneration and the regenerative activities of Emdogain®  
Daisuke SASAKI...35

Analysis of 25 kDa tyrosine phosphorylated proteins in *Porphyromonas gingivalis* LPS-induced mouse B cell proliferation  
Yu SHIMOYAMA...46

Reliability of clinical diagnosis and DIAGNOdent™ measurement value for dental caries comparing with results of contact microradiographic examinations  
Toshinari MIKAMI, Makoto SAITO, Hiroki MATSUMOTO,  
Akiko RYOKAWA, Mitsuro TANAKA, Yasunori TAKEDA...57

### Case reports

A case of carcinoma of the lower alveolus and gingiva in which <sup>18</sup>F-DG-PET was useful for assessing the therapeutic effects of concurrent intraarterial chemoradiotherapy

Hideki HOSHI, Hiroyuki NAKATANI, Yoshiki SUGIYAMA,  
Hideyuki FURUUCHI, Takemitsu SAWADA, Osamu IGARASHI...66

### Lecture

The process and cause of infected root canals after restorations in primary teeth  
Kumiko NOZAKA...75
